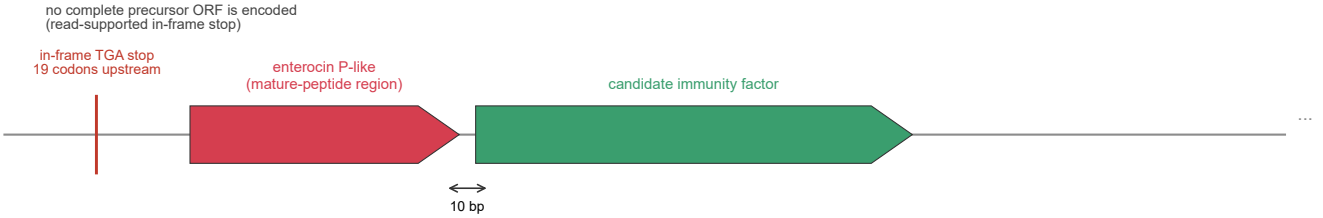
Candidate bacteriocin-associated loci on the shared plasmid (structural detail)

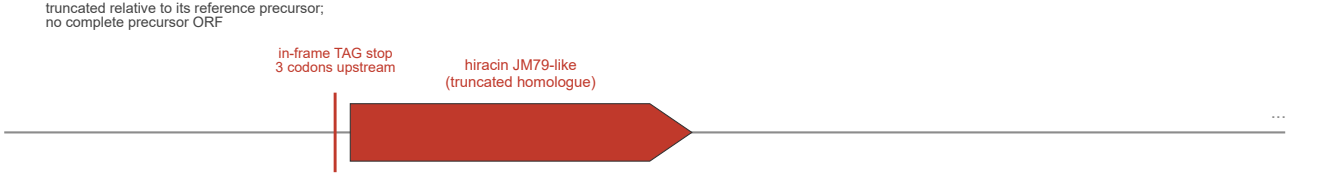
a

enterocin P-like locus (shared plasmid 35,940-36,760)



b

hiracin JM79-like locus (shared plasmid 69,260-70,060)



Coordinates: provider annotation of the shared plasmid. Identities and coverage: Section 3.5; stop-codon support: read pileups (97.4% of 424 and 97.8% of 499 Nanopore reads).
